DEDOPAR				
DedoPAR Light Head				
Y H Y N B	DPAR	PAR Light head, 400/575W daylight The DedoPAR is a 575 / 400 W PAR light head which operates with the Dedolight DEB400D electronic ballast as used with the DLH400D daylight focusing light head and DLH400S daylight soft light	1.863,00	2.236,00 EUR
DedoPAR Components				
Y H Y N B	DPAR-0	Base unit, 400/575W daylight (requires DPAR-S or DPAR-R)	1.129,00	1.355,00 EUR
Y H Y N B	DPAR-R	DedoPAR reflector w/ yoke The PAR light version shows high light efficiency due to good reflector design and a focusing control. The light head without a diffusion lens will give you high light output, but you will experience fairly useable light distribution only in one focusing position for any given distance. As with other PAR lights, the beam can be modified with the use of three interchangeable lenses.		p.o.r. EUR
Y H Y N B	DPAR-S	Direct/soft attachment w/ yoke The front part (reflector) of the DedoPAR can be replaced with the direct / soft attachment. The removable speed ring accepts Dedoflex small and medium silver and white domes as well as Dedoflex Octodome and many Chimera and Photoflex soft boxes	340,00	408,00 EUR
