

SPIRIT ONE S

Product specification sheet

Spirit One S is the natural evolution of Spirit One, our first portable headphones launched in 2012 which have been widely acclaimed for their sound rendering (EISA award 2012-2013) and thanks to which we have been able to learn a great deal. Spirit One S are portable headphones providing tonal balance adapted for noisy environments requiring reinforced bass. These closed back headphones offer unrivalled insulation, thanks to the ear cups which are 7mm larger, and provide significantly increased levels of comfort. The quality of the midrange-treble register has also been greatly improved. Indeed, the lessons learnt with Spirit Classic and Spirit Professional headphones have been applied to the transducer, which features an ultra-light hybrid Mylar/Titanium cone. Finally, the mechanical properties of the headphones have also been greatly improved, the finish is even more elegant and the price is even more competitive.

Key points

- Closed back, circum-aural type
- Portable headphones, light, comfortable and providing excellent insulation
- In-line controller and built-in microphone, compatible with all Smartphones
- Supplied with a rigid carrying case and a soft carrying bag
- A reference in terms of sound quality with reinforced bass for on-the-go use

Accessories supplied

- Rigid and resistant carrying case
- Carrier bag
- 6,35mm/3,5mm Jack adaptor
- Aeroplane connector

Technical specifications

Type	Closed back circum-aural headphones
Impedance	32 Ω
Sensitivity	104dB SPL / 1mW @ 1kHz
THD	<0,3% / 1kHz / 100dB SPL
Frequency response	5Hz - 22kHz
Driver	1 ^{7/16} " (40mm) Mylar/Titanium
Net weight	0.60lb (280g)
Cords length	4.60ft (1.4m)
Carrying case dimension	220mm x 190mm x 100mm
