Let your feet fly...

P1000 & P1000TW
PEDALS
USERMANUAL

### Falcon Beater angle Adjustment

- 1. Using the Mapex drum key supplied with the Falcon pedal turn the drum key screw counter clockwise until the Mapex falcon beater and black beater housing move freely.
- Once you have achieved the desired position for your beater turn the drum key on the drum key screw clockwise and fix the beater into place.

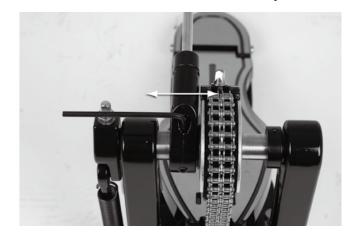

#### ┃ • Lateral : Falcon Beater Position Adjustment

#### Step 1

- Remove the Falcon Beater. Using the Allen wrench supplied with your Falcon pedal, insert into the head of the Allen screw positioned at the front of the black beater holder.
- 2. Turn the Allen wrench counter clockwise until the black beater holder is free to move.

### Lateral : Falcon Beater Position Adjustment

#### Step 2

Find your desired beater holder position (beater position). Turn the Allen wrench clockwise to tighten the beater holder firmly into position.

#### PLEASE NOTE

The same action is performed onto the auxiliary black beater holder when using the Falcon double pedal (P1000TW).

# Changing Falcon Beater Weights

With your Falcon pedal (P1000) you have a replacement 20g weight and with the double pedal (P1000TW) 2PC 20g weights.

#### Step 1

- To change the weights, using the Allen wrench supplied with your Falcon pedal, insert into the Falcon beater head and until you feel the wrench fitting into an Allen screw inside the beater weight.
- 2. Turn the Allen wrench counter clockwise until you feel the 10g beater has loosened.
- 3. Remove the Allen wrench from the beater head and then remove the 10g beater weight.

### Changing Falcon Beater Weights

#### Step 2

- 1. Insert into the falcon beater head the 20g weight with the flat side at the bottom.
- Insert the Allen wrench into the beater head until you feel the wrench fitting into an Allen screw inside the beater weight.
- 3. Turn the Allen wrench clockwise until you feel the beater weight is tight and secure.

#### PLEASE NOTE

The Falcon beater can be used without any beater weights inserted into the beater head for that extreme light feel.

### · Changing the Falcon Spring

#### Step 1

Using the Mapex drum key supplied with the Falcon pedal, turn the drum key screw counter clockwise until the Mapex Falcon spring holder moves freely.

#### Step 2

- 1. Remove the spring holder off of the shaft.
- 2. Remove the actual spring from the black swivel spring holder.

#### TON OC

Remove the spring by loosening the chrome Allen screw.

PERFORMANCE IS EVERYTHING
