

**VCT-SP1BP**

**Extendable Monopod Camcorder Support System**

Enjoy total mobility during your next shoot with the VCT-SP1BP multi-purpose camcorder support system. Ideal for steady, hands-free recording, this system includes a lightweight monopod with a telescopic shaft constructed of carbon fibre composite material and a vest-type support harness. The VCT-SP1BP distributes the weight of the camcorder to both the shoulder and hip, reducing the load weight on the hand/arm and allowing comfortable 'hand-held' shooting for longer.

The VCT-SP1BP features an oil fluid head and counter balance adjustment for smooth tilt action as well as a quick release mechanism. Additionally, this shooting support system includes the RM-1BP LANC camera remote control unit, which can be mounted to the shaft of the monopod for ease of operation in high angle

shooting situations.

\* Please note the RM-1BP is not compatible with the PMW-EX1 or PMW-EX3.

**Features**

**Support for several shooting styles (e.g., high angle shooting)**

**Quick-release function from harness for excellent mobility**

**Carbon shaft for light-weight and rigid design**

**RM-1BP Remote Controller supplied as standard**

**Technical Specifications**

Max height:	(Approx) 1670mm
