Description

ColorSource

ColorSource CE PAR

The ColorSource PAR luminaire is a high-quality and affordable alternative to cheap RGB, RGBW or RGBA LEDs. The broadest colour range possible from a four-colour LED luminaire is created using a proportionate mix of green, blue, lime, and red LEDs. All ColorSource PAR luminaires are colour calibrated for uniformity and compensate for droop while dimming smoothly and maintaining their colour quality.

7412A1205	ColorSource PAR, XLR, Black	692,00	830,40	EUR
7412A1208	ColorSource PAR Deep Blue, XLR, Black	692,00	830,40	EUR

N4086	RJ45 DMX Terminator	19,00	22,80	EUR

NOTE: The ColorSource PAR uses the same accessories as the Desire D40 luminaire

ColorSource CE Spot

The ETC ColorSource Spot brings together the afford ability of a four-colour light engine with the build quality and support of an ETC product. Using a unique mix of red, green, blue and lime LED emitters, the ColorSource spot allows for an amazing range of colour and depth, unlike other low-cost LED fixtures. Because it utilises standard ETC optics, adapters and accessories, it is a versatile solution for any lighting need.

PSF1118	Source Four CYC Floor Base, Black	99,00	118,80	EUR

ColorSource CE Linear

Like the other fixtures in the ColorSource family, ColorSource Linear shines with brighter, richer, and more diverse colours than you'll get with RGB fixtures. With its single-row LED array, this low profile fixture can be quietly tucked away into hard to fit spaces. The optics were designed so there is no visible separation in light when the fixtures are lined up end to end. This slender design and seamless beam of light make it a perfect fixture for dance shows with small wing space, cafeteria stages with limited masking, and foot lights for any stage. Available in 0.5 meter, 1 meter and 2 meter lengths, original or Deep Blue array options

7410K1040	D60 222mm x 222mm Extra Wide - Round Field Lens in Frame, Black	51,00	61,20 EUR
IMPORTANT NOTE:	The Round Field Lenses listed above can be permanently sealed into Desire XT (exterior-rated) luminaires at the factory. This is specifically for situations where the luminaires are to be permanently mounted and the desired field angle is known at the time of purchase. Permanently sealed lenses cannot be removed or changed on-site. To order a Desire XT with factory installed lenses add a third digit after the dash in the part number. For example, 7410A1001-0X2. The 2 indicates Very Narrow lens, 3 indicates Narrow lens, 4 indicates Medium lens, 7 indicates Wide lens, and 9 indicated Xtra Wide lens. A further example: a D40XT Lustr+ with permanently installed Narrow lens set is 7410A1001-0X3.
